Distributing your curated content through a newsletter is a great way to nurture and engage your email subscribers will developing your traffic and visibility. Creating engaging newsletters with your curated content is really easy.Q: ReadWriteObject on a FileSystemWatcher I want to monitor a directory (and create / delete files) when a program is run but I can't seem to get the readwriteobject to work. To test the FileSystemWatcher I created a FileSystemWatcher and subscribed to the Created event using (FileSystemWatcher watcher = new FileSystemWatcher("c:\\test")) { watcher.Changed += new FileSystemEventHandler(this.OnChanged); watcher.Filter = "*.txt"; watcher.NotifyFilter = NotifyFilters.LastWrite; watcher.EnableRaisingEvents = true; } And the event OnChanged looks like this: public void OnChanged(object source, FileSystemEventArgs e) { Console.WriteLine("{0} was created.", e.FullPath);

TrackStudio is a tracking and management software application aimed to allow managers to monitor and track the workflow of their organization. It will offer the users all the required functionalities and functions to effectively manage their business requirements. The program can be used to manage an organization from its most basic to its more complex tasks and will offer a number of features to better control the workflow of each project.
