Hi, I'm trying to learn how to program my VX-3000. I've downloaded the manual that came with it and everything, but it only comes with one small booklet that shows how to program it in. Hello, I purchased a VX-3045 UHF mobile radio in 2013. I noticed in the programming manual that I have that the programming pins are accessible from the back panel of the radio. My radio has two rows of pins, does this mean that I should have to purchase a plug to program the radio? I just want to confirm if the programming will work on my radio. Hi, I purchased a VX-3045 UHF mobile radio in 2013. I noticed in the programming manual that I have that the programming pins are accessible from the back panel of the radio. My radio has two rows of pins, does this mean that I should have to purchase a plug to program the radio? I just want to confirm if the programming will work on my radio. I have a Yaesu VX-3000T I can't get the programming cable to work on it. When I plug in the programming cable it lights up, but I can't use the menu. It does not go to the menu at all, it does not even move. After a while I unplug the programming cable and it turns off. Any ideas? A programming cable is needed for the VX-3000V (Vertex) Hi, I am having a difficult time programming my VX-3000V. The pinout for the programming button looks like the pinout shown below. I am unable to locate a programming cable anywhere. I have a set of 4 PIN cables and a single pin programming cable. Please provide a wiring diagram for the programming cable. Any help would be appreciated. I would like to buy a custom programming cable. I have seen the one on the manual and it looks to be a short, which is probably fine. But I was wondering if there were any other cables that are better. I was wondering if anyone knows if Yaesu, Uniden, or Kenwood makes any custom cables. I know the sellers listed on this site sells them. Does anyone know? I can't find a wiring diagram. Hi, I have a Yaesu VX-3000V (Vertex) and it is not working correctly. I was wondering if anyone knew if 4bc0debe42
