Activation is the process of making a license key that will unlock the software. If you have an account with Adobe, it is very easy to use. The first step is to install the software on your computer. Once the software is installed, the Activation screen will appear. The instructions will tell you how to locate the activation code. You must then find the activation code and copy it to the same folder where the software is located. Once the activation code is copied to the folder, you need to open the folder and then open the software. Find the activation code and paste it into the box on the activation screen. If you are using an account, you should now be able to use the full version of the software on your computer. If you are using a serial number, the same process should work. Just make sure that the serial number is valid.
