The best of what Adobe Photoshop can offer is its innovative toolkit, which

includes more than 100 tools, including autocomplete, cloning, content-aware fill, adjustment layers, and the like. For instance, in Photoshop, you can match colors as you change levels, so that every change is instantly reflected in the image. Over the past few decades, Adobe has continually expanded its tool set to meet user demand, with so many functions now available in the Creative Cloud suite. In 2018, many of the features that were available with previous versions have been retired or remain optional within the Creative Cloud toolkit. This step forward is not only essential for maintaining the quality of the product, but also for keeping costs manageable. On top of all this, Adobe Photoshop also offers products that complement the main Photoshop product, like Elements, the Photoshop Lightroom family, and Photoshop Fix, which includes various Photoshop tools like Retouch, Liquify, and Displace. The Photoshop product line doesn't only include the main Digital Cameraman and Photoshop product, but also the lightroom, Photoshop Elements, Photoshop Fix, and other products. On the website it has been published a report about the new products. The report is called "Discover the New Photoshop Products". As you can see, there are no hints about the timeline, but some of the topics are: "Photoshop Fix", "Photoshop Elements Enhanced", "Photoshop Voyager", and "Adobe Creative Suite Album". So my guess is that some products will be released within the next months.

With the new addition of native GPU-based post-processing and compositing capabilities, as well as the inclusion of the same technology in the new Photoshop Lightroom, there are a number of exciting opportunities to paint and apply computing effects in real-time in Photoshop on the GPU. Boost productivity and simplify your workflow with real-time effects and views. Get insights with the Rapid Suggestions feature and try out new techniques, brushes and colours with the Adobe Color Variance tool. The new Photoshop CC introduces advanced local editing technology, allowing you to apply edits to a few specific areas of an image and continue editing other areas of the image at the same time. Photoshop CC also introduces Template Matching, which uses machine learning with your content to detect similar textures, strokes, layers, etc. independently from other content or options. This new feature significantly reduces the time to create textures and vector masks directly in the XML version of your design files. Adobe Photoshop CC also includes new AI-powered features, including 3D Scene Matching, 3D Refining Materials and 3D Approvals. 3D Scene Matching scans the environment

where the subject lives in and automatically matches the lighting, color and contrast based on the context and content of the surrounding shots. Adobe Illustrator CC is now fully native on macOS, offering real-time curves, pixels, colour management and speed improvements. With a new open-style user interface, Illustrator's keyboard shortcuts are now visible in menus and tooltips.

Adobe Creative Cloud is a subscription service that will be available in several countries for $9.99 per month (US). Individual plans start at just $3.99 per month. More information on the existing plans can be found here . You'll find all of Photoshop's powerful editing features in Photoshop Creative Cloud. Whether it's layers, adjustment layers, filters, or panels, you'll be able to edit all of your photos, create and edit videos, and put your content into a broad array of devices — such as tablets and mobile phones. The next version of Photoshop is being shipped with a new Linux platform. The new platform will enable developers to build some exciting new features. This bodes well for the future of creative professionals. If you're attending Photoshop World North America in November, you'll make a great first step towards becoming a photographer or graphic artist. You can learn everything about Photoshop from top to bottom — it will be an invaluable experience for you and your career. From advanced editing, retouching, and professional results, to new plug-ins and workflow management, there is more to Photoshop than you even think. We can't wait to help you explore it. We will be posting these videos to the Adobe Creative Cloud blog here .

This is a rapidly changing product, and as such, there are also a number of exciting new features on the horizon. Photoshop will become a cross-platform app with a unified user experience for Windows, macOS, and web, and

Photoshop will also involve a new, redesigned interface in the future. These changes are part of the more than 10% of the photo industry expected to move to image editing in the cloud by 2021. Photoshop also adds numerous new features that will be available by 2021 as well, including: Adobe Sensei Lens Improvements – select from a curated list of best-in-class AI features that help detect details such as human faces, people and objects; while still keeping the amount of AI information that a photographer must enter low to keep the features as efficient as possible. Remove the Stylize Shape Tool – to simplify and streamline the removal of unwanted shapes and text in an image. Edit in a Browser – tap the Edit in Browser button and then select a website in your browser to edit a photo that is located on your computer. One-Click Delete and Fill Tool – understand the content that is within an image and make an approval-related decision. Without needing to go back and forth, decide if the content is an okay shape or text to use as filler. Upload for Review – if a photo is created on mobile or the Mac, you can now share the full creative file for feedback. This feature is ideal if you're working on a mobile device while on the go; or create, upload, then share the photo for approval on the desktop. A shared group license can be used and enables users in a workspace to approve or revise a shared image. New Collaboration – set up a shared workspace for a few users…Create and track changes, in addition to improving collaboration and sharing.
